

Tahir Nasoordeen Packeer

BEng Software Engineering Undergraduate (Intern)

I am a motivated Software Engineering undergraduate at APIIT, affiliated with Staffordshire University, eager to contribute and grow in a dynamic, collaborative environment. I am actively seeking opportunities to apply and expand my technical skills while making meaningful contributions to software development projects.

Skills

Languages and Tools

- HTML - CSS
- Google Collab
- Java
- C#
- Laravel
- Flutter / Dart
- MySQL
- Postman
- Xampp
- Figma

Extra Curricular

APIIT Rotaract Club General Member **2023/Present**

Football / APIIT /OKI International

Badminton / APIIT /OKI International

Education

BEng (Hons) Software Engineering
Asia Pacific Institute of Information Technology (APIIT) — 2021- Present, Expected 2026

NCUK International Foundation Year
NCUK International - APIIT Lanka — 2021 - 2022

Cambridge G.C.E Ordinary Level
OKI International School — 2020 - 2021

Projects

Turtlee - Web Applicaton

- Built a responsive web application using HTML, CSS, and JavaScript.
- Implemented features such as user booking visits, hatchery location catalog.

Github Link

Stock Management System

Developed a Desktop application built with C# and SQL for a small scale business Server.

Github Link

Fitness E-commerce Mobile Application

- Built a mobile application using Flutter for the front-end and Laravel for the back-end.
- Implemented features such as user authentication, product catalog, and checkout.

Projects

Edge AI Wildfire Detection System (Final Year Project)

- Developed a lightweight Edge AI system integrating IoT sensor data and satellite imagery for real-time wildfire detection.

Built a multimodal architecture combining:

- MobileNetV2 (satellite image classification)
- MLP model (environmental sensor data)
- Logistic Regression-based late fusion model
- Implemented geographic validation using NASA FIRMS and Sentinel-2 data to simulate real-world wildfire detection scenarios.
- Evaluated system performance against unimodal baselines, demonstrating improved detection through multimodal fusion.
